SPECIAL SECTION: CELEBRATING 40 YEARS OF FIREBIRDS

WHAT GOES AROUND, COMES AROUND

Some things always remain classic. Take the look of retro-style musclecar wheels, for example. Oasis now offers a line of old-school wheels for a nostalgic look and with a modern, deep-lip design. The Retro (pictured) reminisces of the styling found on Pontiac musclecars of the '60s. Oasis Old School wheels are available in 17- and 18-inch sizes, in chrome or polished finishes. These wheels are made in the United States. Prices start at \$330 per wheel. Oasis Wheels, 400 S. Lemon St., Anaheim, CA 92805; (714) 533-3286; www.oasiswheels.com.

LIFT YOUR CARB'S SPIRITS

Now your carb can ride high on your intake for custom performance tuning. Proform introduces its carb spacer kit that allows easy performance adjustments, optimizing air/fuel flow rates in your driveway or at the track. This kit includes a 1-inch thickness frame and three inserts: open, standard four-hole, and tapered four-hole. According to the manufacturer, Proform's light-

weight spacers are "heat resistant, provide minimal thermal transfer, and fight vapor-lock problems." Three inserts allow fine-tuning of the powerband. The manufacturer claims "the four-hole

spacers accelerate airflow to improve low-end torque, while the open insert creates a high-rise manifold effect, increasing plenum volume and moving the throttle blades away from the roof of the manifold runners." This kit further claims to improve air/fuel distribution and flow, as well as add midrange and top-end power. It's designed for Holley 4150-style carburetors and Proform Race Series carbs. The part number is 67160C, and the price is \$62. Specialty Auto Parts USA, P.O. Box 306, Roseville, MI 48066; (586) 774-2500; www.proformparts.com.

FORGED CRANKSHAFT

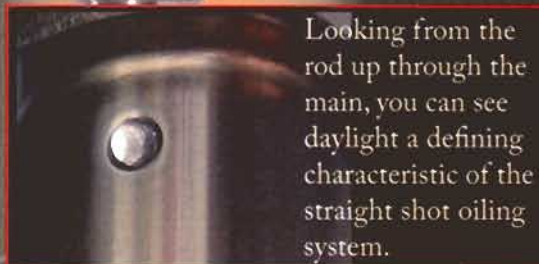

Straight Shot Oiling!

The teardrop "scoop" increases critical oil flow from the main bearings to the rod bearings.

AllPontiac.com and BOP Engineering's forged Pontiac cranks are designed with the latest in oiling technology.

- Available in 3" and 3.25" inch mains
- Available Strokes: 4" - 4.25" - 4.50"
- Latest oiling design
- 4340 material
- Weight approximately 75 lbs.

Looking from the rod up through the main, you can see daylight a defining characteristic of the straight shot oiling system.
